When leaders don't define the grid--when they leave stories to chance--the current weakens. When culture is intentionally crafted, the energy flows clean and true.

The Clean Power Plan simply makes sure that fossil fuel-fired power plants will operate more cleanly and efficiently, while expanding the capacity for zero- and low-emitting power sources.

Recently, the award ceremony of the 6th "Yuzong Cup" Clean Governance Microfilm and Microvideo Competition, themed "Clean Images, Honest Hearts", was held in Liangzhu, Hangzhou.

Major components of the power grid are illustrated in Figure 1 as part of two systems: (1) the bulk energy system consisting of generators and the high Power Grid Anti-epidemic Microfilm [PDF]
