The contracts represent the Platform's second consecutive win in the government tender, following the inaugural Auction in 2024, in which the Platform was awarded contracts for four BESS ...

Going forward, the plan is to launch the first energy storage station around fiscal 2025, and then proceed with the development and operation of energy storage stations one after another.

The push is reinforced by Tokyo's 2025 regulation requiring solar panels on new homes, and the launch of virtual power plant (VPP) programs--slated to begin in fiscal 2026--that will let ...

By connecting to the power grid in the Tokyo area for charging and discharging, it will contribute to stabilizing the supply-demand balance. The project has also been selected to receive a ...

LS Electric will deploy a 20MW/90MWh battery energy storage system (BESS) in Japan after it was awarded the contract through a competitive solicitation process.

Tokyo Century will invest in four wholly-owned extra high-voltage grid-scale battery storage projects totaling 101MW/386.3MWh, the company announced on December 12, 2025. The assets ...

Particularly in the grid-scale battery business, we plan to accumulate expertise and enhance our business execution capabilities by working on self-developed projects, centered on extra-high ...

With its updated energy storage policy, Japan aims to achieve 45% renewable electricity by 2030 while solving the ultimate puzzle: how to store sunshine and wind like canned tuna.

Tokyo's new large-scale energy storage project is set to begin construction in Q1 2025, marking Japan's most ambitious battery storage initiative to date. This renewable energy solution aims to address ...

By 2050, TEPCO aims to leverage distributed energy resources (DERs), including household and EV

Tokyo 2025 Energy Storage Projects

batteries, to potentially supply more than double the power needed in the Tokyo metropolitan area ...
