---

In the spring of 2025, Ukraine's energy sector finds itself at a crossroads. Underneath the constant hum of reconstruction and the lingering threat of war, a quiet revolution is unfolding:...

Ukraine's energy systems have suffered significant damage since the full-scale invasion of 2022. As of spring 2024, two thirds of the country's dispatchable power generation capacity has ...

Ukraine's energy facilities have faced a campaign of destruction since the start of Russia's full-scale invasion, with the attacks intensifying in October 2025.

The IEA says decentralize. Physics says Ukraine needs large storage. Why this matters--for Kyiv and any country facing infrastructure attacks.

With conventional power plants becoming strategic liabilities, distributed energy storage systems paired with solar offer both resilience and rapid deployment advantages.

Ukraine's largest private energy company DTEK will buy storage systems with total capacity of 200 megawatts from a unit of renewable energy storage provider Fluence Energy to ...

The systems will enhance energy security, reduce blackout risks, and help stabilize the grid amid ongoing Russian attacks. Construction was completed in just six months--from March to ...

The UK and Ukraine have launched the InnovateUkraine programme, which will support 13 green energy innovation projects in Ukraine with a & #163;16m investment from the UK government.

Ukrainian private utility DTEK has energised the largest battery storage project in the war-torn country and one of the biggest ones in Eastern Europe. The 200 MW/400 MWh installation ...

# Ukraine 2025 Energy Storage Power Station

According to DTEK, the project can store 400 megawatt-hours of electricity -- enough to power 600,000 Ukrainian homes for two hours. DTEK announced that commercial operations are ...
