Can solar panels power a home?

Solar panels are used to power everything from calculators to sports stadiums to satellites -- and they can just as easily be used to power a home. You don't need to be a rocket scientist - or anything close to it - to get solar panels for your home.

How do I choose a home solar system?

Some of the factors to consider when choosing a Home Solar System are: Understanding your household's energy consumption patterns is crucial when choosing a home solar system. The system's size, cost, and number of panels will depend on the amount of energy you need to generate.

How much does a home solar energy system cost?

Homeowners can run their homes using solar power instead of taking energy from the grid, which lowers energy bills and carbon footprints. A home solar energy system costs between \$18,000 and \$20,000 before any incentives and typically saves homeowners around \$1,500 annually.

How do I buy solar panels?

Contact us. When it comes to buying solar panels, you have a few options: Buying in cash: Purchasing your solar panels outright with a cash purchase brings the best solar savings, no interest, and no monthly payments.
