How many 5G base stations are there in the United States?

While China leads in sheer numbers, the U.S. is making steady progress. By late 2023, the country had between 150,000 and 200,000 active 5G base stations. The deployment strategy in the U.S. is different from China's, as it relies on private investment rather than government-led initiatives. Is this article too long?

What is a 5G base station?

They help fill coverage gaps, improve network reliability, and handle high data traffic. In cities, more than 60% of 5G base stations are small cells, placed on rooftops, lampposts, and building facades. These mini base stations are crucial for delivering consistent 5G speeds in crowded areas like stadiums, shopping malls, and business districts.

How many 5G base stations will China Mobile have in 2025?

China Mobile, the world's largest mobile carrier in terms of subscribers, had previously outlined plans to deploy 340,000 additional 5G base stations in 2025. With these new 5G deployments, China Mobile's total 5G base stations will reach nearly 2.8 million by the end of 2025.

Which country has the most 5G networks in the world?

South Korea is another leader in 5G adoption. With over 200,000 active base stations, the country boasts nearly 90% population coverage. This has made South Korea one of the most connected nations in the world, with advanced use cases in entertainment, healthcare, and finance.

(Yicai) Dec. 13 -- Shanghai continues to lead China in the number of outdoor base stations for fifth-generation mobile network technology, the city's vice mayor revealed.

Mobile operators in China are ramping up 5G and 5G-A rollouts, with the former now at 4.5 million cell sites and the latter in 300 cities.

With steady deployment by all three big carriers and MVNOs, 5G coverage map in the US has grown a lot. See if your city has coverage to 5G network.

Comparison of the number of 5G base stations in the European Union (EU) and selected countries worldwide

# Which cities have 5G communication base stations now

in 2024 [Graph], European 5G Observatory, June 30, 2024.

The map above comes from Ookla's Speedtest Intelligence; and shows where in the world you can 5G mobile phone coverage and when the infrastructure was first built.

5G is available all over the world. Here's which countries have access now and when others will get it, including the US, Canada, Australia, etc.

In terms of infrastructure construction, as of the end of November 2021, China has built a total of 1.396 million 5G base stations. The 5G base stations cover all cities and urban...
