Our front sheet ETFE film provides high levels of resistance to chemicals and weathering as well as low flammability, stress crack resistance, and insulating properties in solar photovoltaic panels.

Get custom cut tapes from LAMATEK(TM) for solar panel frame bonding, junction boxes, and edge protection. Separator pads and surface protection films available.

Typically used in the wind and solar industries, this tape offers environmental and high-temperature resistance, making it suitable for permanent outdoor bonding of solar panels, solar mounting rails ...

Trusted by PV module manufacturers for more than 20 years, this solar edge seal tape protects cells, connections and transparent conductive oxide coatings from moisture ingress, helping ...

Avery Dennison offers pressure-sensitive adhesive tape solutions for a variety of solar panel bonding applications. These durable, UV-resistant solutions are easy to use and automate, and can facilitate ...

We have made it easy to find the perfect adhesive tape solution for your solar panel needs. Whether you're mounting flexible or rigid panels, our product finder helps you navigate through various ...

Photovoltaic tapes for the renewable energy market for bonding, venting, insulation, protection & masking. Custom rolls & die-cut shapes available.

Design optimization: Avery Dennison tapes can replace mechanical fastening methods, offering a thinner profile and lighter weight to help optimize solar panel design. They also spread their ...

Strips or rolls of carrier material coated with single or double-sided adhesive flanked sometimes by removable liners. Tapes are used to attach or arrange materials to each other or in relation to each ...

This 3M tape is the best tape on the market to seal the edge of your solar panel. We recommend this tape to

White tape on photovoltaic panels

reduce infiltration of dust and water under the panel.
