If the sun's shining but you're getting error messages and your solar panels are acting up. Take a look at who repairs solar panels and fixes solar trouble.

What if your solar installer goes out of business? Your original installer should be your first point of contact for any maintenance or repair needs.

While some basic maintenance can be done by homeowners, it's generally recommended to consult a qualified solar technician for any major repairs or troubleshooting.

First, it is important that the homeowner reaches out to their service installer to confirm the issue is with the solar panels and not some other component. Symptoms such as a drop in energy production can ...

Reach out to your state's Solar Energy Industries Association (SEIA) affiliate. In states without a local affiliate, SEIA offers this grievance form. This is a great resource to get advice and ...

If you suspect solar panel damage, the first thing to do is contact the installation company or another qualified solar energy system repair outfit. The technician can accurately evaluate the...

Find the answers to your technical and general questions about Tesla energy products, including Powerwall, solar panels and Solar Roof. If you're interested in purchasing a Tesla energy product, ...

That said, it pays to know beforehand if you're covered, so contact your homeowners insurance company when you get your solar panels installed so you'll understand what is and isn't covered.

Sending a polite e-mail to the company outlining the issue you're having and asking them to repair or replace the solar panels creates proof of your request and gives them a chance to ...

Who should I contact if I have any problems with solar panels

Go to <https://pvwatts.nrel.gov/> to familiarize yourself with an evaluation for solar panels. Go to to familiarize yourself with state incentives in your area. Do you plan on using PV ...
