For the last decade, drivers on Interstate 15 heading through the Mojave Desert between Los Angeles and Las Vegas have passed by the massive Ivanpah Solar Electric Generating System.

Wind and solar farms are wasting energy at rising rates by stopping production because there is not enough capacity to transport or store the electricity when demand is not high enough to ...

The extra layer of scrutiny for wind and solar contrasts with actions by the Trump administration to make it easier and cheaper for companies to produce oil, coal, gas and nuclear power.

Despite the Trump administration's wide-ranging attacks on renewables like wind and solar power, the clean-energy industry is on pace for record growth this year, according to ...

The Trump administration's cancellation of the largest solar project in the United States has sparked confusion and concern among Republicans and Democrats alike.

Just one solar project has been approved on federal lands since Trump took office in January, and none have been permitted since July when Interior Secretary Doug Burgum ordered ...

More than \$14 billion in clean energy investments in the U.S. have been canceled or delayed this year, according to an analysis released Thursday, as President Donald Trump's pending megabill has ...

Since taking office, the Trump Administration has paused permits on all new wind and solar projects on public land, both onshore and offshore. New wind and solar power installations, and...

Several intertwined elements led to the removal of solar power generation. Shifts in governmental policies often strip financial incentives that previously bolstered solar investments, ...

Why was solar power generation stopped

One of the most ambitious solar projects in history is quietly heading for shutdown after just a decade of operation. The Ivanpah Solar Power Facility in California's Mojave Desert was once...
