83M The U.S. has installed enough land-based wind, offshore wind, and utility-scale solar capacity to power nearly 83 million American homes. Utility-scale storage systems provide enough energy to ...

Explore the top 5 ambitious renewable energy projects in the U.S., featuring solar, offshore wind, and battery storage set to transform the energy landscape.

Repsol Renewables North America Renewable electricity generation is one of the main pillars in Repsol's energy transition strategy and commitment to net zero emissions by 2050. In the United ...

The first phase includes 587 MW of solar, 250 MW of wind, and 415 MW of battery storage, combining a total investment of INR22,000 crore (around USD 2.65 billion).

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

The BLM continually receives proposals for utility-scale wind, solar, and gen-tie line projects on public land, which are in various stages of review or implementation.

On this page, you can explore our database of planned wind projects in the US. Each month, we track projects in development and update our list of the largest planned wind projects expected to come ...

Explore top U.S. wind energy projects launching from 2026, with insights on renewable trends, onshore vs offshore growth, and policy impacts on clean power.

With the new projects online, renewables (including wind, solar, geothermal and hydropower) and battery storage now make up 30% of the country's large-scale power generating ...

Wind solar and storage projects under development

Repsol Renewables North America Renewable electricity generation is one of the main pillars in Repsol's energy transition strategy and ...

Dozens of large-scale solar, wind, and storage projects will come online worldwide in 2025, representing several gigawatts of new capacity.
